

Certification

Certifications are professional credentials or licenses that prove an employee has completed training, passed an examination, or met professional standards in a specific field.

What's Still Missing

1. Compliance Analytics Dashboard

For certification compliance, consider adding cards such as:

Active Certifications	125
Expiring in 30 Days	8
Expiring in 90 Days	17
Expired Certifications	3
Compliance Rate	96%

This would transform the screen from a training catalogue into a compliance management tool.

2. Issuing Bodies

The Provider column is currently empty.

A stronger implementation would show:

Course	Provider
GDPR Essentials	ICO
AML Fundamentals	FCA
Health & Safety	IOSH
Cybersecurity Awareness	CompTIA

This helps demonstrate certification credibility and audit readiness.

3. Renewal Alerts

For expiring certifications, add badges such as:

-  Active
-  Expires in 60 Days
-  Expires in 30 Days
-  Expired

This is one of the most valuable compliance features for HR teams.

4. Mandatory Training Compliance

A mature HRIS usually tracks:

Mandatory Training Completion

92%

Employees Overdue

7

Departments at Risk

2

This is particularly useful for healthcare, finance, manufacturing, and government clients.

Examples

HR

CIPM (Chartered Institute of Personnel Management)

SHRM-CP

SHRM-SCP

HRCI Certifications

Finance

ACCA

ICAN

CPA

CFA

IT

Microsoft Certified

AWS Certified

Cisco CCNA/CCNP

CompTIA Security+

Health & Safety

First Aid Certification

NEBOSH

IOSH

Project Management

PMP

PRINCE2

Scrum_Master

Why Add Certifications to MOTEE?

Many organizations struggle to answer questions such as:

- Which employees have expired certifications?
- Who is qualified to perform a specific role?
- Which certifications need renewal next month?
- Which departments have compliance risks?

A Certifications module solves these problems.

What Is Still Missing

△ Professional Certification Register

I would recommend a dedicated register for certifications such as:

Employee	Certification	Issue Date	Expiry Date	Status
John Doe	PMP	Jan 2025	Jan 2028	Active
Mary Smith	First Aid	Mar 2024	Mar 2027	Active

Qualifications & Education Section

I did not see:

- Educational History
- Degrees
- Professional Qualifications
- Memberships

Add:

Education
Certifications
Professional Memberships
Skills
Languages

Very useful for workforce planning.

Skills & Competency Register

One of the biggest opportunities.

Track:

- Skills
- Competencies
- Proficiency levels
- Career aspirations

Example:

Project Management	★★★★★
Excel	★★★★☆
Leadership	★★★★★
Payroll	★★★☆☆

This becomes powerful later for succession planning.

△ Skills & Competency Framework

I still have not seen:

- Skill inventories
- Competency ratings

- Proficiency levels
- Skill-gap analysis

Example:

Skill	Level
Leadership	Advanced
SQL	Intermediate
Project Management	Expert

This remains one of the last major Core HR opportunities.

Employee Summary Widget

At the top of the profile, show:

Profile Completion	92%
Documents Uploaded	14
Years of Service	0.8
Leave Balance	299
Pending Requests	2

This provides an instant snapshot.

HR AI Assistant (Game Changer)

This could differentiate MOTEE from many local competitors.

Examples

Employee asks:

"How many leave days do I have left?"

AI answers instantly.

Manager asks:

"Who are the top-performing sales staff this quarter?"

AI generates the report.

Service self -service dashboard

The only enhancements I would still consider are:

1. Profile Completion Score

A **Profile Completion Score** is a percentage that shows **how complete an employee's profile is** based on the information and documents that HR requires.

Think of it like a progress tracker:

My Recommendation

Add a small card at the top of the Employee Profile:

Profile Completion
92%

Missing Items:

- Degree Certificate
- Professional Membership

And add a KPI on the HR Dashboard:

Employee Data Quality

Average Profile Completion: 94%

Profiles Below 80%: 12

Profiles Missing Documents: 8

This feature is less about HR processes and more about **data quality and compliance**. It helps ensure that employee records are complete, accurate, and audit-ready.

Employment Types

Define and manage contract types used across the organisation.

Bulk Upload

New Employment Type

Export

Type Name	Contract Duration	Leave Entitlement	Payroll	Statutory Deductions	Employees	Status
Full-time	Permanent	28 days/year	Included	PAYE Pension	15	Active
Part-time	Permanent	14 days/year	Included	PAYE Pension	1	Active
Contract	Contract (6 Months)	0 days/year	Included	PAYE	1	Active
Intern	Contract (3 Months)	5 days/year	Included	PAYE	3	Active
Apprentice	Permanent	20 days/year	Included	PAYE Pension	0	Active
Temporary	Permanent	0 days/year	Included	PAYE	0	Active
Freelance / Self-employed	Permanent	0 days/year	Included	PAYE	0	Active
Casual	Permanent	0 days/year	Included	PAYE	0	Active
Seasonal	Permanent	0 days/year	Included	PAYE	0	Active
Remote / Telecommuting	Permanent	28 days/year	Included	PAYE Pension	0	Active

One Enhancement I Would Add

Add a **Benefits Eligibility** column.

Example:

Employment Type	Benefits
Full-time	Health Insurance, Pension, Bonus
Contract	None
Intern	Transport Allowance
Part-time	Pro-rated Benefits

This becomes very useful later when Payroll and Benefits modules are introduced.

Many organizations in Nigeria and across Africa provide:

- Staff loans
- Salary advances
- Cooperative loans

- Emergency loans

Having a dedicated **Staff Loan Register** in Core HR would be a strong differentiator and highly valued by employers even before payroll integration is available.

My Recommendation for MOTEE

Phase 1 (Core HR)

Create:

Employee Loans & Advances

Features:

- Loan request
- Loan approval
- Loan register
- Repayment schedule
- Outstanding balance
- Loan analytics

I would recommend placing **Staff Loan Register** under **Core HR**, provided it is only used for **record keeping and tracking**, not payroll processing.

Why It Fits Core HR Initially

At this stage, you're only tracking:

- ☒ Loan Amount
- ☒ Outstanding Balance
- ☒ Repayment Schedule
- ☒ Loan Status (Active, Closed, Defaulted)
- ☒ Loan Approval Workflow

No payroll calculations are involved.

This makes it an **employee welfare/employee relations feature**, rather than a payroll feature.

Recommended Structure

Core HR → Employee Loans

- Employee Profile
- └ Personal Information
 - └ Documents
 - └ Leave
 - └ Attendance
 - └ Performance
 - └ Learning
 - └ Loans

Loan Register Fields

Field	Example
Loan Type	Staff Loan
Loan Amount	£5,000
Date Issued	01-Jan-2026
Repayment Period	12 Months
Monthly Repayment	£416.67
Outstanding Balance	£2,916.69
Status	Active
Approver	HR Manager

Dashboard KPIs

Employee Loans Dashboard

Total Active Loans	24
Loan Value	£125,000
Outstanding Balance	£78,500
Loans Due This Month	8

When It Moves into Payroll

Once Payroll Phase 2 is implemented, integrate:

```
graph TD; A[Loan Register] --> B[Payroll]; B --> C[Automatic Deduction]; C --> D[Balance Update];
```

Then payroll can:

- Deduct repayments automatically
- Update balances
- Stop deductions when fully paid
- Show loan deductions on payslips

At that point, the loan module becomes a **shared module** between Core HR and Payroll.

Nigeria Benefit Modules

When you eventually build the **Benefits Module**, start with the benefits most Nigerian employers expect:

1. Pension
2. HMO / Health Insurance
3. Group Life Insurance
4. NHF
5. Staff Loans

6. Salary Advances
7. Training Sponsorship
8. Housing & Transport Allowances

These eight benefits will cover the majority of Nigerian organizations and create a strong foundation for future expansion into a full Benefits Administration platform

Benefits Catalogue

Benefits

- └─ Pension
- └─ HMO
- └─ Group Life Insurance
- └─ NHF
- └─ Staff Loans
- └─ Salary Advances
- └─ Leave Allowance
- └─ Housing Allowance
- └─ Transport Allowance
- └─ Training Sponsorship
- └─ Wellness Benefits

Employee Benefits Profile

Employee Benefits

- ✓ HMO
- ✓ Pension
- ✓ Group Life Insurance
- ✓ NHF

Optional Benefits

- ✓ Staff Loan
- ✓ Training Sponsorship
- ✓ Transport Allowance

Common Employer Benefits (Highly Popular in Nigeria)

These are often used to attract and retain talent.

Healthcare

- Enhanced HMO plans
- Family health cover
- Dental care
- Optical care

Financial Benefits

- Housing Allowance
- Transport Allowance
- Meal Allowance
- Utility Allowance
- Leave Allowance

Bonuses

- Performance Bonus
- 13th Month Salary
- Profit Sharing
- Sales Incentives

Learning & Development

- Training Budget
- Professional Certifications
- Exam Sponsorship
- Conference Attendance

Employee Welfare

- Staff Loans
- Salary Advances
- Earned Wage Access
- Cooperative Schemes

UK Benefit Module

Common Employer Benefits

These are the benefits many UK employers use to attract and retain talent.

Healthcare

- Private Medical Insurance
- Dental Insurance
- Optical/Vision Cover
- Health Screening.

Protection Benefits

- Life Assurance
- Income Protection
- Critical Illness Cover.

Financial Benefits

- Bonus Schemes
- Salary Sacrifice Programmes
- Season Ticket Loans
- Employee Loans
- Financial Wellbeing Support.

Lifestyle Benefits

- Gym Membership
- Employee Discounts
- Cycle-to-Work Scheme
- Electric Vehicle Schemes
- Company Car Schemes.

Learning & Development

- Professional Memberships
- Certification Sponsorship
- Training Grants
- Study Support.

3. Modern UK Benefits

Many UK employers now focus heavily on wellbeing.

Wellbeing Benefits

- Mental Health Support
- Employee Assistance Programme (EAP)
- Counselling Services
- Wellness Programmes.

Flexible Working

- Hybrid Working
- Remote Working
- Flexible Hours.

What MOTEE Should Build

For a UK-ready Benefits Module, I would structure it as:

Benefits

- └─ Pension
- └─ Private Medical Insurance
- └─ Dental Cover
- └─ Life Assurance
- └─ Income Protection
- └─ Employee Assistance Programme
- └─ Cycle to Work Scheme
- └─ Employee Loans
- └─ Salary Advance
- └─ Learning Sponsorship
- └─ Gym Membership
- └─ Flexible Benefits
- └─ Benefits Analytics
